OneConnect conferencing is just a phone call away!

- Connect users through local or toll-free conference bridges provided with your account setup
- Use application sharing tools for presentations and demonstrations over the web
- Moderators receive a single code for customer care, audio, and web conferencing
- OneConnect's online customer care portal gives your business the ability to:
 - Manage your accounts
 - Add, edit and delete your moderators as you wish
 - Access reporting on demand – monthly, Year-to-date, usage by department/account, etc.
- Simply provide your callers with your local or toll-free conferencing number, pass code, and OneConnect web lite or web pro URL to start a conference
- Use the MS Outlook plugin to add conference details to your meeting makers
- Conferencing charges will be consolidated on your OneConnect bill

ONECONNECT WEB PRO

Direct your conference attendees to the login web portal. Full reports on attendance and surveys are instantly e-mailed to the conference host when the conference is finished.

Attendee lists make it easy to see who is logged in and initiate chat sessions.

Publish common file formats, such as PowerPoint, Excel & MS Word and save them to your personal account for re-use or browse your PC to select a file.

Easy-to-use buttons for session start/stop, document publishing, application sharing, pointers & highlighters, screen and slide navigation, and in-session surveys of attendees.

Web Pro automatically finds your open desktop applications and shares only the ones you choose - great for demos and training!
