Log into your phone account from anywhere in world to make and receive calls or change your personal account settings to reflect your personal preferences.

See who is calling and use features like ad-hoc conferencing, file sharing, and messaging on top of traditional features including hold, call forward, and call display - all at the tip of your mouse.

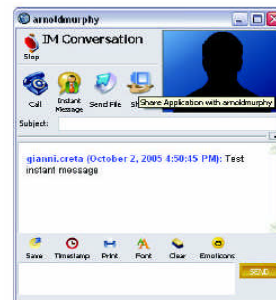

Friends Online drastically reduces voicemail and phone tag by allowing you to see when your co-workers are on the phone or available for a call... or browse your entire directory to call someone with a click of your mouse!

Never miss a call with Find-Me/Follow-Me or choose which calls reach you, when and where you need them, with customized call routing.

Secure Instant messaging reduces e-mail and voicemail. An extremely useful tool for personal collaboration during conference calls or to communicate with others and push files while you're on the phone.

“As an IT person, Telephony was thrown in my lap. OneConnect hosted telephony frees up valuable IT resources to do better things, and we still retain control of adding and modifying users – the headaches are not my problem anymore.”
 - Corey Cox, IT Director, Tandet Management
